Summary

Computer Science Engineering student with **6 months of full-stack development internship experience**. Experienced in building REST APIs, backend services, and database-driven applications using Node.js, React.js, MySQL, and MongoDB. Strong foundation in C++, Data Structures and Algorithms, OOP, and DBMS.

Education

MIT World Peace University — Pune, India

B.Tech in Computer Science & Engineering | CGPA: **8.89**/10.0 | No active backlogs — 07/2024 – 06/2027

Diploma in Computer Science & Engineering | CGPA: **9.52**/10.0 — 06/2021 – 06/2024

Experience

Full Stack Developer Intern — 01/2024 – 06/2024

Elastik Teams — *Remote*

- Developed and maintained an internal **Office Project Management System** using React.js, Node.js, Sequelize, and MySQL to support project tracking, employee allocation, and technology assignments.
- Designed and integrated **REST APIs, Sequelize models, and MySQL relationships** for project creation, employee assignment, access control, workload visibility, and filtered data retrieval.
- Built reusable React components and handled **frontend, backend, API, and database issues**, including form validation, error handling, and query optimisation to improve reliability and maintainability.
- Used **Jira** for issue tracking and collaborated through Git, Bitbucket, Confluence, and agile development workflows.

Projects

AI-Powered Mock Interview Platform | *Node.js, Express.js, MongoDB, Mongoose, Ollama, Llama 3.2*

- Developed an **AI-powered mock interview platform** with **JWT authentication**, bcrypt-based password security, REST APIs, and MongoDB persistence for user-specific resume processing.
- Built a resume-processing pipeline using **Multer, pdf-parse, and rule-based parsing** to extract skills, projects, experience, education, and candidate context from uploaded PDF resumes.
- Integrated **Llama 3.2 through Ollama** for semantic resume analysis and personalized interview question generation, with a **heuristic fallback** to maintain functionality when the LLM service is unavailable.

Nexus — Full Stack Social Platform | *Node.js, Express.js, React.js, MongoDB, Socket.IO*

- Built a full-stack social media platform with **JWT authentication**, MVC-style architecture, MongoDB with Mongoose ODM, and **13 REST API endpoints** for authentication, users, posts, and messaging.
- Implemented **real-time messaging** using Socket.io, persistent direct messages, and user follow/unfollow and search functionality using MongoDB queries and regex-based filtering.
- Developed a React frontend with **protected routes**, Axios interceptors for Bearer token handling and 401 responses, and live user search with instant results.

Technical Skills

Programming Languages: C++, Python, JavaScript, C, SQL

Backend Development: Node.js, Express.js, REST APIs, Socket.IO, JWT, MVC Architecture

Frontend Development: React.js, HTML5, CSS3, Axios

Databases & ORMs: MySQL, MongoDB, Sequelize ORM, Mongoose ODM

Developer Tools: Git, GitHub, Jira, Confluence, Bitbucket, AWS Cloud Basics

CS Fundamentals: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Certifications

- The Complete Full-Stack Web Development Bootcamp – *Udemy*
- C++ (Basic) Certification – *HackerRank*
- Short Term Program on Cloud Computing – *Bhartiya Skill Development University (BSDU), Jaipur, Jan 2023*
- Machine Learning & Deep Learning: Theory to Practice – *NIT Goa, Jan 2026*
